**Subject:** Water Availability letter Item 7.1

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

This report is unclear and does not indicate the severity of our current drought. How can you ask the public to cut back while approving thousands of new units?  
At least you should be making suggestions for reducing water in these new units, but you don't even do that.  
Please do not approve this report.

Good afternoon,

With the drought and steady warming temperatures. clearing native vegetation and building more houses does nothing but increase those problems.

This report is unclear and does not indicate the severity of our current drought. How can you ask the public to cut back while approving thousands of new units?

At least you should be making suggestions for reducing water in these new units, but you don't even do that.

Please do not approve this report.

Thank you

Alex Dosh
