

AB1234 Report
Lynne Plambeck
GSA Meeting
Virtual Meeting July 12, 2:30PM

The Groundwater Sustainability met and approved a substantially increased budget for the coming year. They also heard a report from the Peer Review team, Jacob Engineering, regarding any issues with the Flow Model. They brought up some points which seemed to have been corrected. They said that they were not tasked with ensuring the accuracy of the numbers, only with assessing that the process would work properly if accurate numbers were used.

A GSP update was also provided by Rick Verguitz, giving timelines for the expected completion of various tasks.

Subject: Santa Clarita Valley Chamber of Commerce Mixer.
Event Date: July 14, 2021

The monthly Chamber of Commerce Mixer was hosted by Valencia Acura. This was the first mixer hosted and attended in person instead of virtual. The event was attended by approximately 135 attendees. Those attending the event were chamber members and some of our stakeholders.

Times have changed and will continue to change so we must get aboard and look for ways to make meaningful changes in business and life.

RJ Kelly
