

The Trails at Lyons Canyon Water Supply Assessment

Water Resources and Watershed Committee

March 9, 2022

Item 4

Rick Vasilopulos

Presentation Outline

SB 610 WSA Process and Requirements

Project Description & Water Demands

Available and Anticipated Water Supplies

Review and Management of Demand and Water Supply Risks

Review of SCV Water's Historical Operations

Supply and Demand Comparisons

Conclusions and Recommendations

SB 610 Water Supply Assessment Process

Project application sent to Lead
Agency who determines whether the project is subject to CEQA and SB 610 requirements

Lead Agency
contacts the
Project's service
area water
supplier and the
supplier must
prepare the WSA
within 90 days, but
can request
extension

Water supplier
prepares analysis
of the Project's
water demands
and compiles a
supportive record
using the most
recent Urban
Water
Management Plan

Water Supplier's
Board of Directors
determines if
supplies are
sufficient for the
proposed Project
and sends
Assessment with
findings to the
Lead Agency

SB 610 Water Supply Assessment Requirements

- Analyze the Project's water demand
- Quantity of water received by Water Supplier in prior years from:
 - Water Supply Entitlements
 - Water Service Contracts
 - Groundwater
- WSA to show 20-year projected supply will meet demands
 - For normal, single dry and multiple dry years for the Project + existing and planned future uses
 - Future planned supplies can be considered in projections
- Water Supplier Board of Directors approval of the WSA

The Trail at Lyons Canyon Project Description

- The Project is within the SCV Water service area
- The Project is on 233 acres within six planning areas
- The Project consists of 517 dwelling units located in 2-3 story detached condominiums and 43 affordable senior apartments
- The Project will also have a community recreation area, drainage basins and a site for a future fire station

The Trail at Lyons Canyon Location

Circle and The Old Road, in unincorporated LA County.

SB 610 Requirement:

The Trail at Lyons Canyon Demand Assessment Analysis

PROJECTED DEMANDS						
Land Use	# of units	Unit	Demand (AFY)			
Multi-Family Condominium	517	DU	102.51			
MF Condo Open Space	31.9	Acres	100.17			
Landscaped Areas	2	Acres	6.28			
Senior Apartment	36	DU	3.77			
Fire Station	60.1	TSF	13.94			
Drainage Basin	N/A	N/A	0			
Recreation Center	29.6	TSF	6.86			
Total	234					
Projected Si	248					
Projected Mul	239					

Project is part of the City of Santa Clarita and Los Angeles County One Valley-One Vision General Plan, as such, demands were incorporated into the 2020 UWMP

Water Supply Approach

- Project's WSA relies on current and future SCVWA water supply portfolio
- The WSA references the supply portfolio as described in the 2020 UWMP with modifications due to:
 - DWR's December 2021 Draft Delivery Capability Report
 - Modified schedules for the recovery of impacted well capacity due to PFAS, VOC and Perchlorate contamination

2021 SWP Delivery Capability Report

- Draft Report Issued December 31, 2021
- Uses Updated Model (CALSIM3) with longer hydrologic record
- Draft Report indicated reduction of average reliability from 58% to 56% and single dry-year from 7% to 5%
- Analysis was updated using currently available data
 - Resulted in minor modifications to reliability tables

Modified Schedule of Well Restoration

- Saugus Well 201
 - On-line date deferred from 2022 to 2024
 - Accommodated installation and permitting for additional VOC treatment
- Saugus Well 205
 - On-line date deferred from 2022 to 2024
 - Currently in design for Perchlorate & VOC treatments
- PFAS impacted Alluvial Wells
 - Well supply of 15,270 AFY to return by 2025
 - Additional Well supply of 6,420 AFY to return by 2030
 - Resulted in minor modifications to reliability tables

Current Supply Portfolio

Current Supply	Amount (AFY)	
SWP Table A Amount (single dry - normal)	4,760-53,300	
Groundwater		
Alluvium	15,000-16,000	
Saugus	7,500-15,000	
Groundwater Banking Programs		
Semitropic	5,000	
Rosedale-Rio Bravo	10,000	
Transfers & Exchanges		
AVEK - 2 for 1 Exchange	5,174	
UWCD - 2 for 1 Exchange	500	
BV-RRB Transfer Agreement	11,000	
Yuba Accord Water	1,000	
Recycled Water	450	

Future & Proposed Supplies

Planned Supplies	Amount (AFY)	Proposed On- Line Date				
Future and Recovered Groundwater						
Saugus Wells 201 & 205	5,210	2025				
Saugus Wells 3 & 4	8,060	2025				
Saugus Wells 5 & 6	6,460	2027				
Saugus Wells 7 & 8	6,460	2030				
Recoverd Alluvial Wells	23,490	2030				
Recycled Water						
Phase 2 Projects	2,440	2023				
FivePoint Westside Communities	5,174	2021-2043				
Banking Programs						
Rosedale-RB Additional Extraction	10,000	2030				
Semitropic - NLF	4,950	2035				
Nickel Water - NLF	1,607	2035				

Groundwater Quality

- Groundwater Quality Issues
 - Restoration of PFAS impacted wells
 - Restoration of perchlorate impacted wells
 - Permitting of additional Saugus wells
- Approach consistent with 2020 UWMP
 - Historical and Current Conditions Assessed
 - Treatment methods and scheduling identified
 - Permitting path documented

Climate Change

- Restructured UWMP Information to provide additional text in main report
- Water Demand anticipated to increase by 3.77% by 2050 consistent with DWR's SGMA approach
- Groundwater supplies are based on modeling that incorporated the DWR's same SGMA approach
- SWP Reliability 2019 Delivery Capability Report (DCR)
 - Incorporates a sea level rise of 45 cm

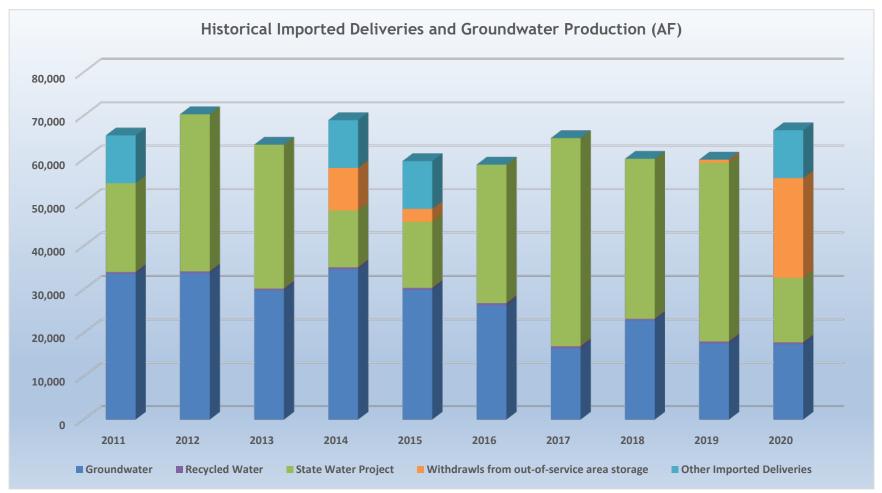

Pending Water Conservation Regulations

- Potential reduction of Indoor water use to 42 gpcd
- Potential regulation to mandate irrigation water efficiency
 - Irrigation efficiencies gains would offset reduced recycled water availability

SB 610 Requirement: Assessment of Recent Operations

Conclusion: SCV Water demonstrated an ability to conjunctively use its imported surface water and groundwater along with recycled water and conservation to meet water demands facing the dual challenges of severe drought and restricted groundwater supplies.

SB 610 Requirement

Water Balance Analysis Performed for:

- Normal
- Multiple Dry-Years
- Single Dry-Year

Conclusion: Water Supply exceed projected demands in normal, multi dry-years and single dry-years throughout the study period

Conclusion:

- Staff has evaluated the long-term water demand and has compared these needs against existing and planned water supplies
- Demand projections were based on:
 - Population projections
 - County and City land use plans
 - Both active and passive conservation
 - Climate change impacts
- The WSA concluded that the total projected water supplies over the 30-year projection period are sufficient to meet the projected demands associated with the proposed Trails at Lyons Canyon Project as well as existing and planned future uses

Recommendation

Staff recommends that the Water Resources and Watershed Committee recommend that the Board of Directors of the Santa Clarita Valley Water Agency adopt a resolution approving the SB 610 Water Supply Assessment for the Trail at Lyons Canyon Project and direct staff to submit the WSA to the County of Los Angeles.
