

SCV WATER AGENCY TELECONFERENCE REGULAR BOARD MEETING

TUESDAY, JULY 20, 2021 START TIME: 6:30 PM (PST)

Join the Board meeting from your computer, tablet or smartphone: https://scvwa.zoomgov.com/j/1605137784

-OR- +1-(833)-568-8864 Webinar ID: 160 513 7784

To participate in public comment from your computer, tablet, or smartphone:

When the Board President announces the agenda item you wish to speak on, click the "raise hand" feature in Zoom*. You will be notified when it is your turn to speak.

To participate in public comment via phone:

When the Board President announces the agenda item you wish to speak on, dial *9 to raise your hand. Phone participants will be called on by the LAST TWO digits of their phone number. When it is your turn to speak, dial *6 to unmute. When you are finished with your public comment dial *6 to mute.

Can't attend? If you wish to still have your comments/concerns addressed by the Board of Directors, all written public comments can be submitted by 4:30 PM the day of the meeting by either e-mail or mail.** Please send all written comments to the Board Secretary. Refer to the Board Agenda for more information.

Disclaimer: Pursuant to the Executive Order N-08-21 issued by Governor Newsom, public may not attend meetings in person. Public may use the above methods to attend and participate in the public board meetings.

^{*}For more information on how to use Zoom go to <u>support.zoom.us</u> or for "raise hand" feature instructions, visit <u>https://support.zoom.us/hc/en-us/articles/205566129-Raise-Hand-In-Webinar</u>

^{**}All written comments received after 4:30 PM the day of the meeting will be posted to yourscvwater.com the next day. Public comments can also be heard the night of the meeting.

SANTA CLARITA VALLEY WATER AGENCY REGULAR BOARD MEETING AGENDA

SANTA CLARITA VALLEY WATER AGENCY RIO VISTA WATER TREATMENT PLANT 27234 BOUQUET CANYON ROAD SANTA CLARITA, CA 91350

TELECONFERENCE ONLY NO PHYSICAL LOCATION FOR MEETING

TUESDAY, JULY 20, 2021 AT 6:30 PM

TELECONFERENCING NOTICE

Pursuant to the provisions of Executive Order N-08-21 issued by
Governor Gavin Newsom on June 11, 2021, any Director
may call into an Agency Board meeting using the Agency's
Call-In Number 1-(833)-568-8864, Webinar ID: 160 513 7784
or Zoom Webinar by clicking on the link https://scvwa.zoomgov.com/j/1605137784
without otherwise complying with the Brown Act's teleconferencing requirements.

Pursuant to the above Executive Order, the public may not attend the meeting in person. Any member of the public may listen to the meeting or make comments to the Board using the call-in number or Zoom Webinar link above. Please see the notice below if you have a disability and require an accommodation in order to participate in the meeting.

We request that the public submit any comments in writing if practicable, which can be sent to ajacobs@scvwa.org or mailed to April Jacobs, Board Secretary, Santa Clarita Valley Water Agency, 27234 Bouquet Canyon Road, Santa Clarita, CA 91350. All written comments received before 4:30 PM the day of the meeting will be distributed to the Board members and posted on the Santa Clarita Valley Water Agency website prior to the start of the meeting. Anything received after 4:30 PM the day of the meeting will be posted on the SCV Water website the following day.

OPEN SESSION BEGINS AT 6:30 PM

- 1. CALL TO ORDER
- 2. PLEDGE OF ALLEGIANCE
- 3. PUBLIC COMMENTS Members of the public may comment as to items within the subject matter jurisdiction of the Agency that are not on the Agenda at this time. Members of the public wishing to comment on items covered in this Agenda may do so at the time each item is considered. (Comments may, at the discretion of the Board's presiding officer, be limited to three minutes for each speaker.) Members of the public wishing to comment on items covered in Closed Session before they are considered by the Board must request to make comment at the commencement of the meeting at 6:30 PM.

27234 BOUQUET CANYON ROAD • SANTA CLARITA, CALIFORNIA 91350-2173 • 661 297•1600 • FAX 661 297•1611 website address: www.yourscvwater.com

NOTICES

Any person may make a request for a disability-related modification or accommodation needed for that person to be able to participate in the public meeting by telephoning April Jacobs, Secretary to the Board of Directors, at (661) 297-1600, or in writing to Santa Clarita Valley Water Agency at 27234 Bouquet Canyon Road, Santa Clarita, CA 91350. Requests must specify the nature of the disability and the type of accommodation requested. A telephone number or other contact information should be included so that Agency staff may discuss appropriate arrangements. Persons requesting a disability-related accommodation should make the request with adequate time before the meeting for the Agency to provide the requested accommodation.

Pursuant to Government Code Section 54957.5, non-exempt public records that relate to open session agenda items and are distributed to a majority of the Board less than seventy-two (72) hours prior to the meeting will be available for public inspection at the Santa Clarita Valley Water Agency, located at 27234 Bouquet Canyon Road, Santa Clarita, CA 91350, during regular business hours. When practical, these public records will also be made available on the Agency's Internet Website, accessible at http://www.yourscvwater.com.

ITEM NO. 5.1

Minutes of the Regular Meeting of the Board of Directors of the Santa Clarita Valley Water Agency – July 6, 2021

A regular meeting of the Board of Directors of the Santa Clarita Valley Water Agency was held via teleconference at 6:30 PM on Tuesday, July 6, 2021. A copy of the Agenda is inserted in the Minute Book of the Agency preceding these minutes.

DIRECTORS PRESENT: Kathye Armitage, B. J. Atkins, Beth Braunstein, Ed Colley, William

Cooper, Jeff Ford, Jerry Gladbach, R. J. Kelly, Gary Martin, Dan

Mortensen, Piotr Orzechowski and Lynne Plambeck via

teleconference.

DIRECTORS ABSENT: None.

Also present via teleconference: General Manager Matthew Stone, General Counsel Tom Bunn and Joe Byrne, Board Secretary April Jacobs, Assistant General Manager Steve Cole, Chief Engineer Courtney Mael, Chief Financial and Administrative Officer Eric Campbell, Chief Operating Officer Keith Abercrombie, Director of Finance and Administration Rochelle Patterson, Director of Operations and Maintenance Mike Alvord, Director of Tech Services Cris Perez, Communications Manager Kathie Martin, Customer Service Manager Kathleen Willson, GIS Manager Jose Huerta, Human Resources Manager Ari Mantis, Information Technology Supervisor Jeff Herbert, Principal Engineers Brent Payne and Jason Yim, Engineer Orlando Moreno, Associate Engineer Elizabeth Sobczak, Senior Management Analyst Kim Grass, Financial Analyst Darine Conner, Executive Assistants Eunie Kang and Leticia Quintero, Senior Office Assistant Terri Bell, Accounting Tech II Kyle Arnold, and members of the public.

President Martin called the meeting to order at 6:30 PM. A quorum was present.

Upon motion of Vice President Mortensen, seconded by Director Atkins and carried, the Board approved the Agenda by the following roll call votes (Item 4):

Director Armitage	Yes	Director Atkins	Yes
Director Braunstein	Yes	Director Colley	Yes
Director Cooper	Yes	Director Ford	Yes
Vice President Gladbach	Yes	Director Kelly	Yes
President Martin	Yes	Vice President Mortensen	Yes
Director Orzechowski	Yes	Director Plambeck	Yes

Upon motion of Director Cooper, seconded by Vice President Mortensen and carried, the Board approved the Consent Calendar which included Resolution Nos. SCV-219, SCV-220, SCV-221 and SCV- 222 by the following roll call votes (Item 5):

Director Armitage	Yes	Director Atkins	Yes
Director Braunstein	Yes	Director Colley	Yes
Director Cooper	Yes	Director Ford	Yes
Vice President Gladbach	Yes	Director Kelly	Yes
President Martin	Yes	Vice President Mortensen	Yes
Director Orzechowski	Yes	Director Plambeck	Yes

Upon motion of Director Plambeck, seconded by Director Orzechowski and carried, the Board approved the procurement of a Blue Star Model NG600-01 Dual Fuel Generator in the amount of approximately \$275,000 by the following roll call votes (Item 6.1):

Director Armitage Yes Director Atkins Yes
Director Braunstein Yes Director Colley Yes

Director Cooper	Yes	Director Ford	Yes
Vice President Gladbach	Yes	Director Kelly	Yes
President Martin	Yes	Vice President Mortensen	Yes
Director Orzechowski	Yes	Director Plambeck	Yes

Upon motion of Director Cooper, seconded by Vice President Gladbach, the Board rejected a resolution dispensing with the four-fifths, majority vote for retail debt by the following roll call votes, 10 yes votes were needed for this item to pass (Item 6.2):

Director Armitage	No	Director Atkins	No
Director Braunstein	No	Director Colley	Yes
Director Cooper	Yes	Director Ford	Yes
Vice President Gladbach	Yes	Director Kelly	Yes
President Martin	Yes	Vice President Mortensen	No
Director Orzechowski	Yes	Director Plambeck	No

Upon motion of Vice President Mortensen, seconded by Director Atkins and carried, the Board approved Resolution No. SCV-223 authorizing the incurrence of obligations exceeding the SB 634 retail debt single issuance limitation for the purpose of financing the acquisition of PFAS Treatment Facilities by the following roll call votes, 10 yes votes were needed for this item to pass (Item 6.2):

Director Armitage	Yes	Director Atkins	Yes
Director Braunstein	Yes	Director Colley	No
Director Cooper	Yes	Director Ford	Yes
Vice President Gladbach	Yes	Director Kelly	Yes
President Martin	Yes	Vice President Mortensen	Yes
Director Orzechowski	Yes	Director Plambeck	Yes

RESOLUTION NO. SCV-223

RESOLUTION OF THE BOARD OF DIRECTORS OF THE SANTA CLARITA VALLEY WATER AGENCY **AUTHORIZING THE INCURRENCE OF OBLIGATIONS EXCEEDING THE SB 634 RETAIL DEBT SINGLE ISSUANCE LIMITATION** FOR THE PURPOSE OF FINANCING THE ACQUISITION OF PFAS TREATMENT FACILITIES

https://yourscvwater.com/wp-content/uploads/2021/07/SCV-Water-Approved-Resolution-070621-Resolution-SCV-223.pdf

Upon motion of Director Atkins, seconded by Director Armitage and carried, the Board approved returning to fully in-person Board and Committee meetings as of September 7, 2021 (which would include the September 2, 2021 Engineering and Operations Committee meeting), in accordance with policies, procedures and legal requirements in effect prior to Governor Newson's stay at home orders of 2020 and as described below with the addition of a presentation coming from the Director of Technology Cris Perez on August 3, 2021 relating to options for remote public participation and costs.

- Attendance by Directors at all Board and Committee meetings will be in-person with no remote attendance permitted without prior approval of the Board President or the full Board.
- Attendance by members of the public at Board and Committee meetings will be inperson only and no remote attendance will be provided.
- Board meetings will be held at the Rio Vista Water Treatment Plant in the Boardroom.
- As requested by staff, the following Committee meetings will be held at Summit Circle in the Training Room: Engineering and Operations, Public Outreach and Legislation, and Water Resources and Watershed. The Finance and Administration Committee will be held at the Rio Vista Water Treatment Plant in the Boardroom.
- Public comment at Board and Committee meetings can be made in person, and/or in
 writing. For members of the public who are not able to attend meetings in person and
 wish to submit written comments, we request that they provide them to the Board
 Secretary for Board meetings by 4:30 PM on the day of the meeting and for Committee
 meetings to the staff person listed on the Committee agenda by 4:00 PM on the day of
 the meeting. Public comment made in writing will be distributed to the Board and
 Committee members prior to the meeting and will be posted on the SCV Water website.
- Public health protocols will be as required by the California Department of Public Health and will require unvaccinated attendees to wear protective face masks.

Approved by the following roll call votes (Item 6.3):

Director Armitage	Yes	Director Atkins	Yes
Director Braunstein	Yes	Director Colley	Yes
Director Cooper	No	Director Ford	Yes
Vice President Gladbach	No	Director Kelly	Yes
President Martin	No	Vice President Mortensen	No
Director Orzechowski	No	Director Plambeck	Yes

General Manager's Report on Activities, Projects and Programs (Item 7).

The General Manager reported on the following:

His most recent vacation and how he appreciated the time off which he spent with family.

He mentioned that this week our finance staff had "gone live" with our new financial system. Training efforts are now underway with the wider staff who will be working with the system. There is some residual work to "cut over" from the legacy system to close out last fiscal year, and new projects and expenditures will be handled through the new system as they come in. At an appropriate time, we can have our finance team provide an update to the Finance and

Minutes of July 6, 2021 Page 5 of 7

Administration Committee and to the Board, if desired. He wanted to acknowledge this significant progress point.

Lastly, he reminded the Board that at the last Board meeting, he had alerted the Board to a developing situation with chlorine supply on the west coast and noted staff would be working on contingency planning. In the ensuing two weeks, much has been accomplished and the Agency appears to be in good shape. He reported that our Chief Operating Officer Keith Abercrombie gave an update at the July 1, 2021 Engineering and Operations Committee meeting, and the Committee recommended that a similar update be provided at a future Board meeting. He will ask Keith and Director of Operations and Maintenance Mike Alvord to give an update to the Board as part of the General Manager report at the July 20, 2021 regular meeting.

Committee Meeting Recap Reports for Informational Purposes Only (Item 8).

There were no comments on the recap reports.

Written Reports for Informational Purposes only (Item 9).

There were no comments on the written reports.

President's Report (Item 10).

The President updated the Board on upcoming meetings and events.

AB 1234 Written and Verbal Reports (Item 11).

Written reports were submitted by Vice Presidents Gladbach and Mortensen and Directors Ford and Plambeck which were included in the Board packet. Additional written reports were submitted by President Martin, Vice President Gladbach and Director Atkins which were posted on the SCV Water website and are part of the record.

Director Cooper reported that he attended the June 23, 2021 ACWA Region 1 Program on Regional Drought Impacts: How Well Managed Water Supplies Went Dry on June 23, 2021 and attended the 4th Annual VIA State of the State Program held at the Hyatt on June 25, 2021.

There were no other AB 1234 Reports.

BOARD MEMORANDUM

DATE: July 20, 2021

TO: Board of Directors

FROM: Mike Alvord

Director of Operations & Maintenance

SUBJECT: Approve Receiving and Filing the Public Re-notification of PFOS and PFOA

Notification Level Exceedances

SUMMARY AND DISCUSSION

In March 2019, State Water Resources Control Board, Division of Drinking Water (DDW) issued a Source Investigation Order to certain California Water Systems based on sampling results from the 2013 – 2015 Third Unregulated Contaminant Monitoring Rule (UCMR3). In accordance with this Order, Santa Clarita Valley Water Agency (SCV Water) was required to sample 15 drinking water wells for Per- and Polyfluoroalkyl Substances (PFAS) for 4 consecutive quarters beginning in the second quarter of 2019. There are no regulatory standards for any PFAS compounds. However, in June 2018, California's Office of Environmental Health Hazard Assessment (OEHHA) and DDW established interim notification levels (NL) for two PFAS compounds, Perfluorooctanesulfonic acid (PFOS) at 14 nanograms per liter (ng/L) and Perfluorooctanoic acid (PFOA) at 13 ng/L and a response level (RL) for PFOS and PFOA combined of 70 ng/L. In August 2019, DDW revised and lowered the NL for PFOS and PFOA to 6.5 ng/L and 5.1 ng/L respectively. In February 2020, DDW lowered the response levels for PFOS and PFOA to 40 ng/L and 10ng/L respectively. These RLs are based on a quarterly running annual average (RAA). OEHHA is also scheduled to release Public Health Goals for PFOS and PFOA in 2021.

SCV Water has proactively shut down any well exceeding a RAA RL. Currently there are 13 wells offline due to an exceedance of the PFOA RAA RL. There are 3 wells (N, N7, and N8) which have been returned to service with ion exchange treatment to remove PFAS and 3 additional wells (Mitchell 5B, Sierra, and W10) which are below the RAA RL and being returned to service. The next round of quarterly sampling is scheduled for August 2021.

Therefore, in accordance with State law (Health and Safety §116455) SCV Water is required to notify the governing bodies of any local agencies whose jurisdictions include areas supplied with their drinking water within thirty (30) days of official notice of results from the analytical laboratory. This includes SCV Water Board of Directors, Santa Clarita City Council and the Los Angeles County Board of Supervisors. Attached is the notice to the SCV Water Board of Directors. In addition, SCV Water will provide consumer notice in its annual Consumer Confidence Report. We will update the Board with any further required notification after additional information and results are received.

FINANCIAL CONSIDERATIONS

None.

RECOMMENDATION

That the Board of Directors receive and file the public notification of PFOS and PFOA notification level exceedances, which is attached.

Attachment

M65

Re-notification of PFAS Detection in SCV Wells

Issued July 20, 2021

State law requires public water systems to notify local governing bodies whenever a well exceeds a maximum contaminant level, notification level, or a response level. This notification is being provided to the Santa Clarita City Council, the Los Angeles County Board of Supervisors, and the Board of Directors of the Santa Clarita Valley Water Agency. The last notification letter was sent in January of 2021.

Record of PFAS in the Santa Clarita Valley

In May 2019, as part of quarterly sampling required by the State Water Resources Control Board – Division of Drinking Water (DDW), SCV Water sampled 15 wells for per- and polyfluoroalkyl substances (PFAS). Of the wells tested, 8 were above the interim notification levels (NL), however none were above the response level (RL) set by DDW.

SCV Water then elected to voluntarily sample all active wells on a quarterly basis. The total current impact in our service area is 13 wells out of service due to PFAS exceeding response levels, and three wells returned to service after installation of a treatment facility. Additional treatment facilities are planned or under design or construction to return more wells to service in the coming years.

DDW recommends that consumers receiving water exceeding the NL and RL be notified. In addition to inclusion in our annual water quality consumer confidence report, SCV Water outreach on this issue includes:

- A webpage dedicated to PFAS information at www.yourSCVwater.com/PFAS.
- Special edition e-newsletters on PFAS.
- Press releases on sampling results, treatment plans and other related activity.
- Participation in water industry panels.
- State and regional awards for crisis communication and outreach efforts on the PFAS issue.
- American Public Works Association High Desert Chapter Environmental Project of the Year award

What are PFAS?

PFAS are a large group of human-made substances, including PFOS and PFOA, that do not occur naturally in the environment. They are resistant to heat, water, and oil. PFAS have been used extensively in surface coating and protectant formulations. PFOA and PFOS are no longer manufactured or imported into the United States; however, there could still be some imported goods containing trace amounts of these substances.

Based on the evaluation of human and animal toxicity data, exposure to PFOA and PFOS in tap water over certain levels may result in adverse health effects including hepatotoxicity, immunotoxicity, thyroid toxicity, reproductive toxicity, and cancer (pancreatic and liver).

SCV Water has assembled a team of staff and industry experts to assess and implement treatment options, as well as continue testing all active wells in our system.

Additional information can be found at https://yourscvwater.com/pfas/.

Anyone with questions about this notice should contact Ryan Bye, Water Quality Supervisor for SCV Water, at (661) 388-4988.

Sampling results from May 2021. These are wells currently in use which exceed the Notification Level. No wells exceeding the Response Level are in service, except those with operational treatment facilities installed which are effective at removing PFOS and PFOA.

Well	PFOS	PFOA
Notification Level (ng/L)	6.5	5.1
207	4.2	6.6
C1	6.5	<2.0
E15	4.7	6.9
E17	3.8	5.9
Lost Canyon 2	9.1	4.4
Lost Canyon 2A	7.3	3.5
Mitchell 5A	9.4	5.7
Mitchell 5B	15	6.7
P1	18	8.7
Sierra	16	7.0
W10	4.6	8.0

Notification level: The concentration level of a contaminant in drinking water delivered for human consumption that the department has determined, based on available scientific information, does not pose a significant health risk but warrants notification pursuant to this section. Notification levels are nonregulatory, health-based advisory levels established by the department for contaminants in drinking water for which maximum contaminant levels have not been established. Notification levels are established as precautionary measures for contaminants that may be considered candidates for establishment of maximum contaminant levels, but have not yet undergone or completed the regulatory standard setting process prescribed for the development of maximum contaminant levels and are not drinking water standards.

Response level: The concentration of a contaminant in drinking water delivered for human consumption at which the department recommends that additional steps, beyond notification pursuant to this section, be taken to reduce public exposure to the contaminant. Response levels are established in conjunction with notification levels for contaminants that may be considered candidates for establishment of maximum contaminant levels, but have not yet undergone or completed the regulatory standard setting process prescribed for the development of maximum contaminant levels and are not drinking water standards.

CONSUMER CONFIDENCE REPORT

SCV Water Regular Board Meeting

What is a CCR?

CCR stands for Consumer Confidence Report

 Prior to the 1996 Safe Drinking Water Act
 Amendments, it was referred to as the Annual Water Quality Report (AWQR)

 Consists of water quality and other data from the previous calendar year

WHO MUST PREPARE A CCR?

- All Community "Public" Water Systems
- All Nontransient-noncommunity
- Public Water System (PWS), same 25 people, over 6 months per year

Currently SCV Water has 7 separate PWS Codes

WHY IS THERE A CONSUMER CONFIDENCE REPORT?

- California AWQR 1990
- Safe Drinking Water Act 1996
- Includes specific information
- Goals of community trust and transparency

Next to doing the right thing, the most important thing is to Let people know you are doing the right thing.

John D. Rockefeller

YOURSCVWATER.COM

WHAT CONTENT IS REQUIRED IN THE CCR?

Water sources

Groundwater, surface water

Drinking Water Source Assessment

New water sources

Board meetings

Contact information

WHAT CONTENT IS REQUIRED IN THE CCR?

- Primary drinking water standards (health-based)
- Maximum Contaminant Levels (MCL)
- Microbiological contaminants
- Total coliform (TC)
- Treatment plant turbidity
- Treatment techniques (TT)

YOURSCVWATER.COM

WHAT CONTENT IS REQUIRED IN THE CCR?

- Lead and copper
- Consumer Taps
- Sodium and hardness
- Secondary drinking water standards (aesthetic)
- Secondary MCL
- Unregulated contaminants
- Boilerplate language

Water Quality Report

The State Water Resources Control Board Division of Drinking Water (DDW) requires community water systems to publish and make available an annual Consumer Confidence Report to provide background on the quality of your water and to show compliance with federal and state drinking water standards.

This 2021 Annual Water Quality Report is a snapshot of the quality of local water supplies in the Santa Clarita Valley during 2020. Included are details about where your water comes from, what it contains and how it compares to strict Federal and State standards. We are committed to providing you with information because informed customers are our best allies.

Our Promise to Our Customers:

Clean, Safe Water That You Can Trust

Dear Customer:

The past year has brought all of us challenges and uncertainty. One thing that our customers can rest assured about is that our team of essential workers continues to provide you with clean, safe water day and night.

SCV Water and Los Angeles Waterworks District #36 have worked together to provide you with our 2021 Water Quality Report that explains:

Where your water comes from

How we treat and monitor it thousands of times per year

How we ensure its safety when it reaches your tap

As you read this report, you'll also find important information on our Agency's future planning efforts, programs and initiatives.

We appreciate playing such a large role in the fabric of the Santa Clarita Valley and being a trusted source for your water supply.

Manager | SCV Water Matthew G. Stone

Assistant Deputy Director | LACWD #36 Russ Bryden

WHERE DOES OUR WATER COME FROM?

SCV Water's water supply comes from four main sources, imported water, groundwater, recycled water and water banking (storage). Leveraging multiple sources of water ensures our customers always have water when they need it.

GROUNDWATER

our water comes from local, sustainable groundwater sources. These underground water aquifers store water that naturally More than a quarter (17,300 acre-feet) of comes from precipitation.

RECYCLED WATER

Less than one percent of our water currently comes from recycled water. Future plans will expand our recycled water use for outdoor ingstion to ensure our customers have a ingstion to ensure our customers have a reliable water source for years to come.

IMPORTED WATER
We rely on imported water from the State
Water project for nearly 75 percent (48,300
acre-feet) of our water needs. This water
journeys hundreds of miles from the Sierra

Nevada's in Northern California before reaching the Santa Clarita Valley.

STORED (BANKED) WATER
OUR Agency also stores (banks) 14,000
acre-feet of water in nearby Kern County.
This water is available to us in times of need,
such as during a drought or emergency.

SCV WATER SNAPSHOT

Serving our community safe, reliable water that meets or surpasses rigorous state and federal standards is a hallmark of our against, it bakes a lot of teating, schoolg reservoirs, and pipes, along with our talented team of water professionals, to make answers is delivered to your homes 24/17.

141,000 Acre-feet Water Stored in Kern County

Water Talk: How much water Is

In an acre-foot?

20+ Billion Gallons of Water Served to Customers

One acre-foot of water equals 325,951 gallons of water. That's enough water to cover a football field one foot deep; combined, our water sources equal 206,870 acre-feet

SCV Water | 3

Every three years, each water system is required to sample for lead and copper at specific customer taps as part of the Lead and Copper Ruik. Lead and copper are also lested in source water supplies 16, groundwater and surface water), in 2015, SCV Water also tested all public K-L2 schools in the service area No traces of lead were decided in any source waters in the Sarka Clarka Valey by any of the local water systems.

infants and young children are typically more vulnerable to bead in dinking water than the general population, and serbus health problems sooul result frow water system is responsible for providing high quality of help was to to carnot control the materials used in customer plumbing components. It is possible

that lead levels at your home may be higher than at other homes in the community as a result of materials used in your

west, you may with in hose your water restrict by a private
Recoratory if your water has been strong to several hours, you
can flustly your tep of 120 seconds to 2 minuse before using
to water. Additional information on lead in driving water,
easting markhout, and steep you can take to minutes exposure
is available from the USEPA's Sist Criming Water Hottine
(Both 425-479) or at www.eps.gov/lead.

DRINKING WATER SOURCE ASSESSMENT AND PROTECTION

The sources of divising water both tap water and bottled would trusted host likes, straining pointly, reservoir, springs, and water. As water travels over the surface of the land or through the ground; it describes makingly occurring minerals and, it some crace, radioactive makerial and care judge and assessment and are serviced or animals or from human activity.

Contaminants that may be present in source water include:

- Marchia confaminatis such as viuses and backets that may come from sawage treatment plants, septic systems, agricultural twistock operations and wild file.
- Inorganic contaminate, such as saits and metals, that can be interested contaminate month, including or result from urban stormwater month, included or domestic waterwater decharges, oil and gas production, making, or farming.
 - Peakcides and herbiddes that may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses.
- Organic chemical contaminants, including synthetic and wideline organic forentical train in thy production of habitatal processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application gas stations, urban stormwater runoff, agricultural application.
 - Radoactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities. and supplic systems.

To ercure that tap water is safe to drift, the USEPA and the Sale Water Resources Control Board (SMRCB) Division of Drinking Water

water and local groundwater wells are tested at least arrivally for VCDs. Thicknowly have IVCD and Testedhoodshylane PCEI was recombined by the VCDs. Thicknowly have found in trace amounts (below the MVLL) at a few locations. Correamption of water containing TVE or PCE in excess of the MCL own many was may lead to there problems and an increased risk of carcer. Organic chemical contaminants including synthetic and volatile organic compounds (NOC) are by-products of industrial processes and patroleum production. Treated imported surface

Turbidity is a measure of the cloudiness of the waker. We monitor it because it is a good indicator of water quality. High turbidity can hinder the effectiveness of disinfectants. Furthermore, at the treatment plants, turbidity is monitored bacause it is a good indicator of the effectiveness of our fittration systems.

6 | SCV Water

(DOW) prescribe regulations that limit the amount of certain containments in water provided by public water systems. U.S. Food and Drug Administration regulations and California Law also establish limits for constainments in borlied water than provide protection for public health. Additional information on potudid water is variable on the California Department of Public Health waters of scribics agov/programme/CEMICEDCS/Pages/ Mabprogramme/CEMICEDCS/Pages/

and assesses potential sources of contamination from sources such as day cleaners, also repair shops, gas stations, modical facilities, schools and other facilities located in the worldy of each groundware source. Every water division completed the Dehrking Water Source Accessment and Protection (DWSAP) program for existing groundwater sources in 2002. DWSAPs are also compared for each new groundwater well placed into service by wrater systems. Each DWSAP looks at vulnerability to contamination.

An accessment of the driving water source, Well EL7 for the Valencia with or Discharge and as was completed May Valencia with white Publisher sevices are as was completed May 2000 as part of the permitting process for the new well. There are no brown containment sources deficied in the water are no brown containments source deficied in the water paper, Well EL7 is considered most whereable to chemical, patrician pipeline and electrical/electronic manufacturing that shows a security of With any detectable commental month or Highway 125, of Commerce Center Divis, of a more information regarding DWSAP, contact your local supplier or visit the following weekster, without business or water the following weekster, or with or was supplier or visit to collowing weekster, or with or was supplier or visit to collowing weekster, or which or was supplier or visit to collowing weekster, or with or was supplier or visit to collowing weekster, or with or was supplier or visit to collowing weekster, or with or was suppliered to the collowing weekster, or with or was suppliered to the collowing weekster or with or was supplied to the collowing weekster or with or was supplied to the collowing weekster or with or was supplied to the collowing weekster or with or was supplied to the collowing weekster or with or was supplied to the collowing weekster or with or was supplied to the collection of the collection of the collection or was collected to the collection of drinkingwater/DWSAP.html. You may request a summary of the assessment be sent to you by contacting the SWRCB DDW district engineer at (B18) 551-2004.

SCV WATER SOURCES OF WATER SUPPLY

sources are served in various proportions to service areas within the Newhall Water Division (NWD), Santa Clarka Water Division (SCWD), SCV Water provides dinibing water from multiple sources. State water Project waste in profestion in Northean California, be resaled brough one of our two treatment glants and then enter the clarifultion system. Groundwater is purmoed from two natural undigipound againers; the Auther at on the Saugus Formalism. Recycled waster is also provided for some higalion uses. These Recycled waster is also provided for some higalion uses. These and Valenda Water Division (WWD). In addition, SCWMA provides freated water to Los Angeles County Waterworks District #36.

LOS ANGELES COUNTY WATERWORKS DISTRICT 336 serves approximable 3,500 customers to cased in Hardge Cargon and Yall Words, brough 1,350 melaned corrections. The Districts waker supply is composed of 100% groundwater from one well puringing from the Saugas formation beneath the District's service area and 0% of imposted water.

9

unincorporated community of Val Verde, on Del Valle Road, Hadley Canyon Road to Uncoin Avenue. Craws will install a new District 36 will begin work to replace an aged water main in the water main to enhance water conservation and improve water supply throughout the district. The work is scheduled to begin October 2021 through March 2022.

SCV WATER - NEWHALL WATER DIVISION SANS CUSTOMERS TO COURTED IN THE CASEL, KNAMINI PIERRE BAT SEND ON VISION OF VISION AND ASSAURCE AND ASSAURCE AS

SCV WATER - SANTA CLARITA WATER DIVISION provides water to a perion of the City of State Clarita and univergendad areas of Los Argaise County including Sayapa, Caryon Country and Newfall. Customers received approximately 84% imported water and 16% local groundwater in 2020. SCV WATER - VALENCIA WATER DIVISION supplies waker to customers in Valencia Seweron Ranch, and parts of Castalc, Saugus, and Newhall. In 2020, customers received 73% imported water (25% local groundwater and 2% recycled water (selfwared to large landscape customers).

CHEMICALS IN THE NEWS

contamination from historic Industrial operations that used, stored, or disposed or perchiorate and its safe. Perchiorate has been shown to interfere with uptale of lodde by the throld gland, and thereby reduce the production of thyroid hormones gland, and thereby reduce the production of thyroid hormones. leading to adverse effects associated with inadequate hormone levels. Perchlorate is an inorganic chemical used in solid rocket propellant, fineworks, explosives and a variety of industries. It usually gets into drinking water as a result of environmental.

A known parchlorate contaminant plane has been identified and activated between the law teaded positive for perchibition. In October 2007, the DDW actober an WZ. of 6 ug/L for perchipition. DDW bound an amendment to SCWM — Imported perchipition. DDW bound an amendment to SCWM — Imported DW and between the second of 20, 2010, authoriting the use of the perchipitide, treatment facility and, an about 25, 2014, SCWM — Imported DWston histochack the

treated water into the distribution system in full compliance with the requirements of its amended water-supply permit.

FER. AND POLYFLUOROMLKYL SUBSTANCES (PFAS) For and polyhrocably substances (PFAS) are a group of charricastrat are estatant to heat, water, and old FFAS have been classified by the United States Environmental Protection Agency (USEPA) as an emerging contaminant on the national landscape.

previatint PFAS substances, parfutorooctanoic acid (PFOs), and perviatint PFAS substances, parfutorooctanoic acid (PFOs), in addition, the California State Wash Resources Control Board – Division of Dinhing Wash (DCW), has see fordification and response levels for PFOs, and PFOS. A north calcin level (NL) is a health based advisory level for constituents exceeding these values. A response level (RL) is a non-regulatory pre-carifornia; woodn'ny these values. A response level (RL) is a non-regulatory pre-carifornia; having some a value source from service, blend or provide treatment if that option is valuationer. The EFA has not yet established enforceable dirinking water standing, called markinum containant levels (PLL), for these autorises, but they have beaded Health Advisory Level or 70 managrams per filer (ng/L) for a combined level of two of the more

In June 2018, DDW sat Initial NLs for PFOA (14 ng/L) and PFOS of LS ng/L) and a combined negocine which for PFOA and PFOS of 20 ng/L. In March 2019, DDW Issued a series of orders related to the sampling for FFAS chemicals. After an initial round of monitoring 2 CW was revolutaring yearnowed one will from service, which exceeded the combined RL. Then in February 2020, DDW revised the NLs and adopted frontylast RLs for PFOA (10 ng/L) and FCOS (40 ng/L) based on a turning arrust average. SCV Water responded by voluntarity removing 14 additional wells from service.

from savice as ongoing moritoring revealed FCA concentrations approaching the ILI no Teachmais, 2020 SCV Water brought the Trist ion exchange treatment for FFA online, bringing the while back find savice, comerkly, SCV White is in various stages of design and construction for FFAS treatment plants to return more orthises while beach find savice. Since February 2020, additional wells were voluntarily removed

Sample results tabulated in the table of this report are for the 2020 calendarysar. However, SZV Water is confiniting PFA moritoring in wells. Data in the table may reflect wells that are no longer in savies. For more information and resources on PFA, yield in savies.

HOW DO CUSTOMERS ACCESS THE CCR?

SANTA CLARITA VALLEY WATER QUALITY REPORTS

The Consumer Confidence Report, or CCR, is an annual water quality report that the Safe Drinking water Act (SDWA) requires SCV water to provide all of its customers. The purpose of the CCR is to raise customers' awareness of the quality of their drinking water, where their drinking water comes from, what it takes to deliver water to their homes, and the importance of protecting drinking water sources.
