

WHERE DOES OUR WATER COME FROM?

SANTA CLARITA VALLEY WATER SUPPLY PORTFOLIO

IMPORTED WATER (STATE WATER PROJECT)

About half of our water comes from the Sierra Nevada range. It flows off the mountains then through the delicate Sacramento-San Joaquin Delta before reaching the Santa Clarita Valley via the State Water Project aqueduct.

GROUNDWATER

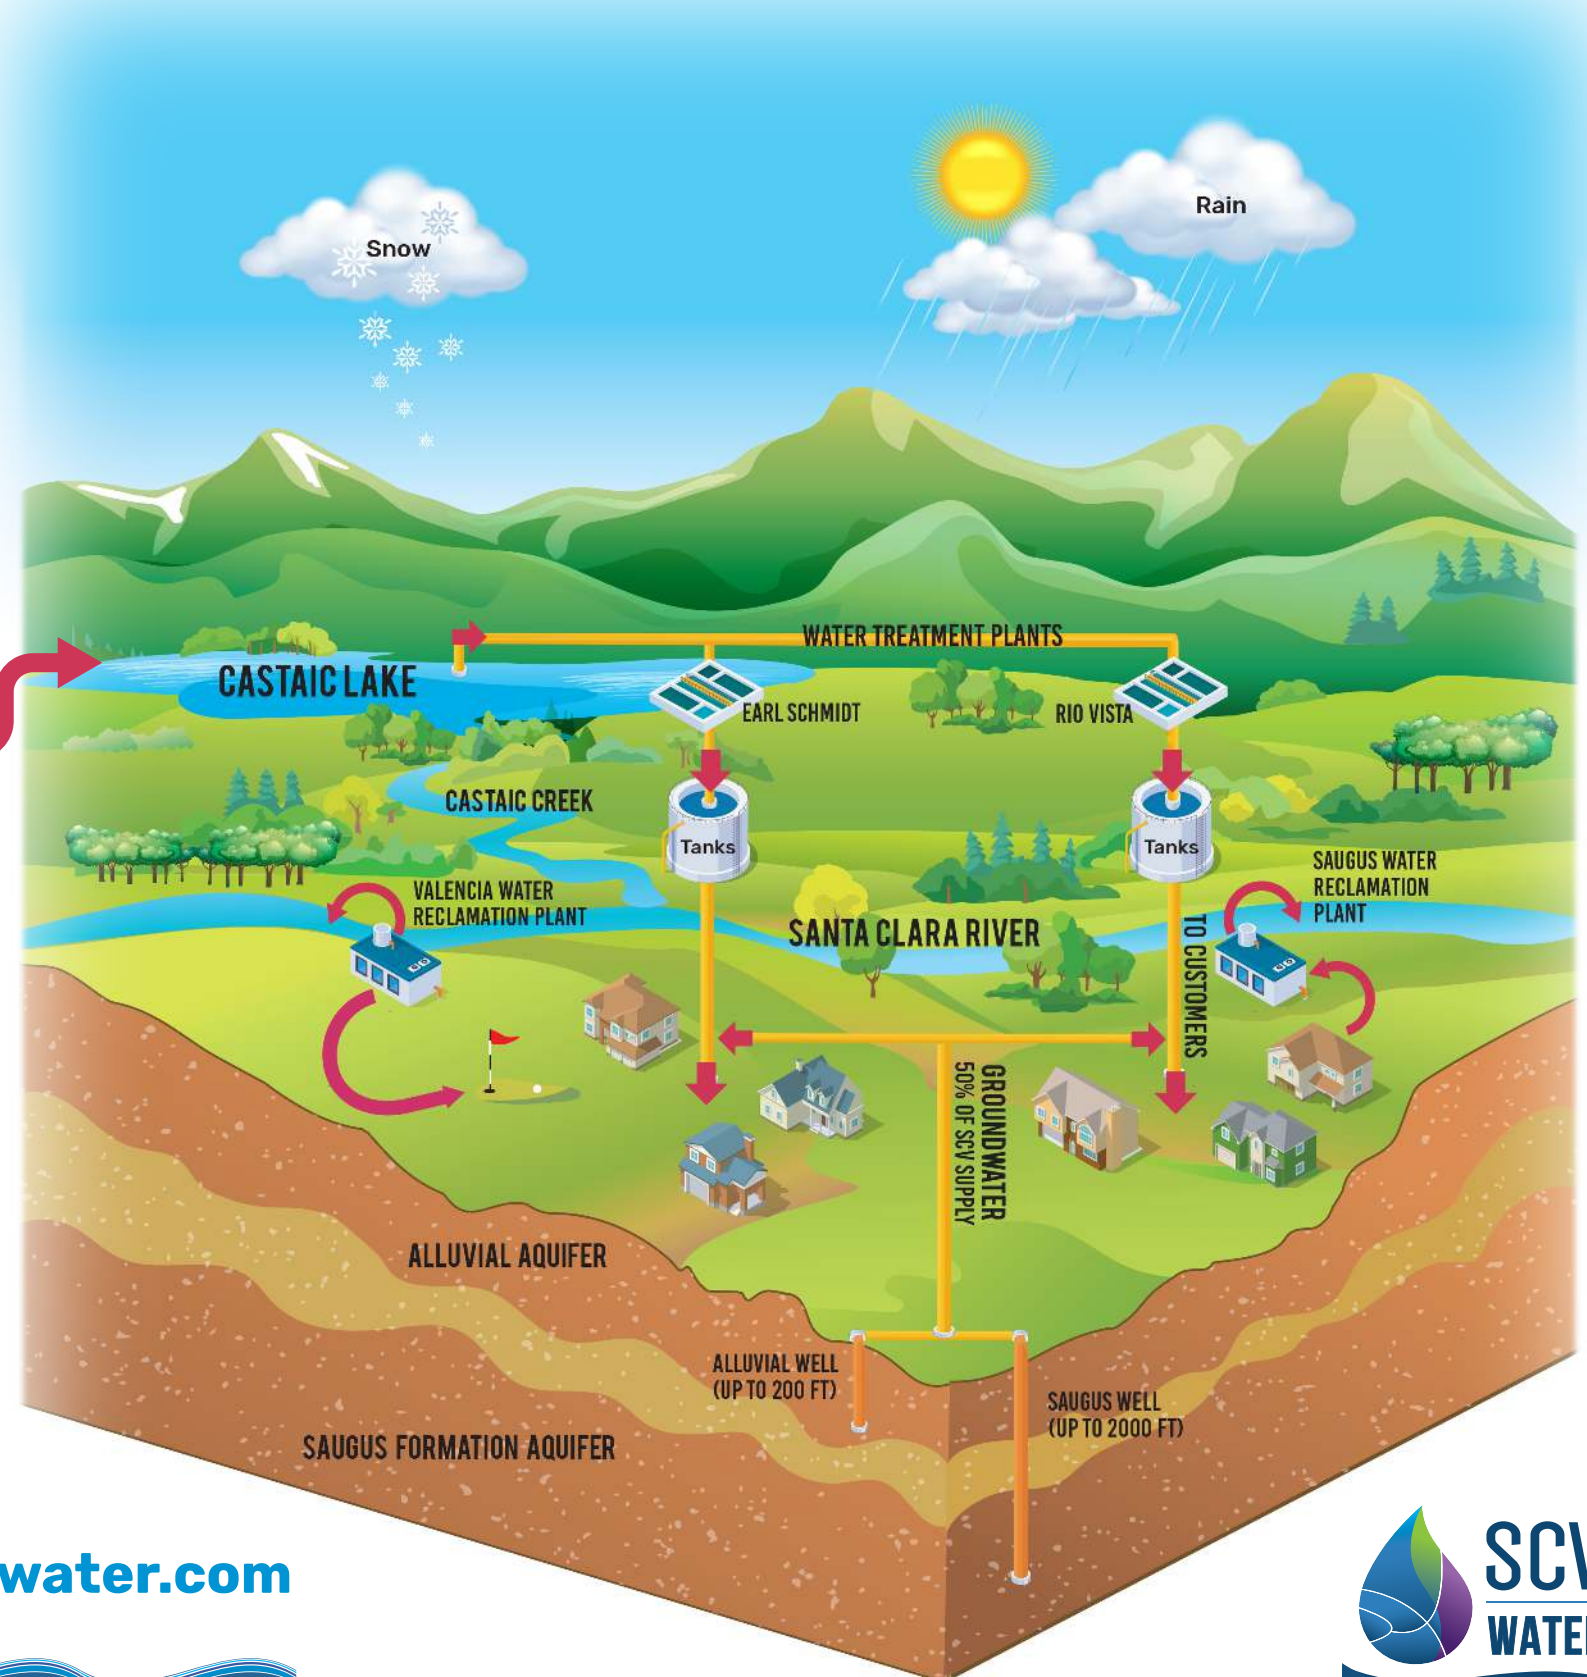

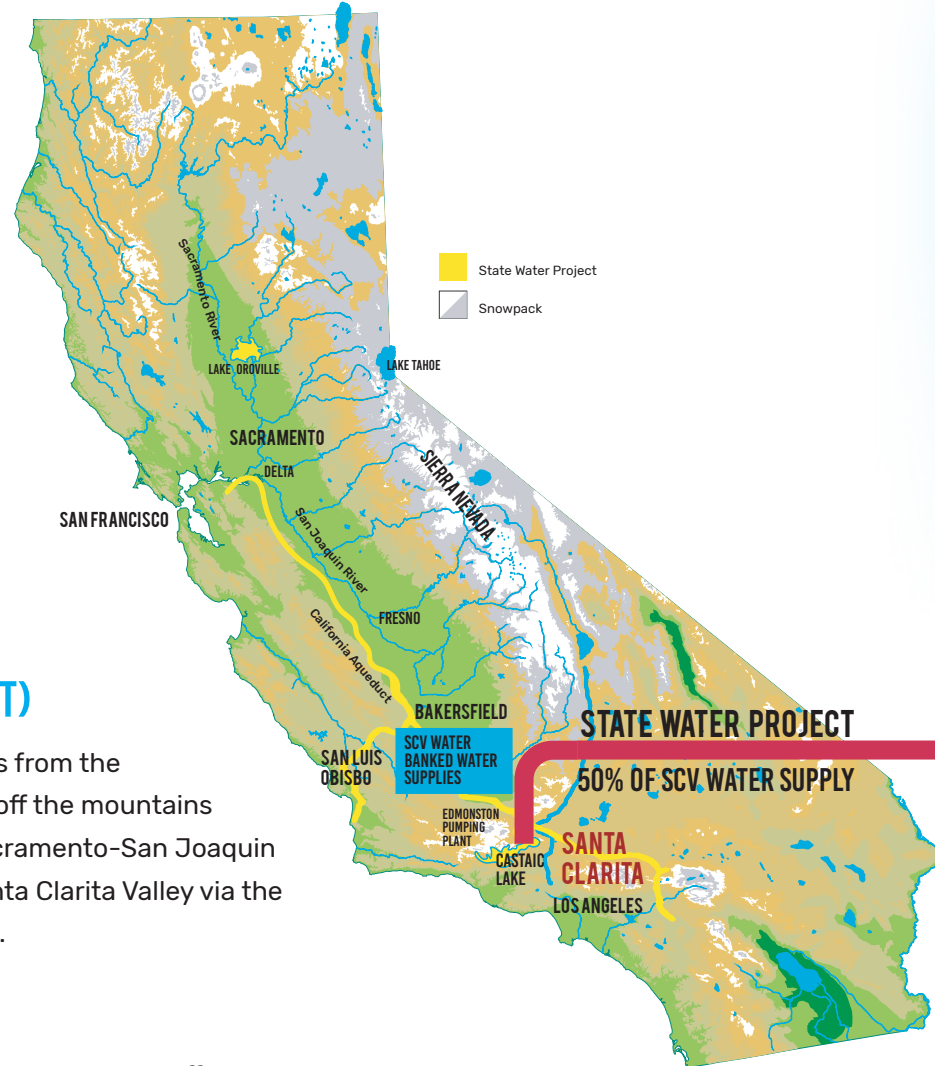

Groundwater is local, sustainable and cost-effective. It represents about half of our supply in an average year. A series of wells pump the groundwater into our system.

RECYCLED WATER

SCV Water has the opportunity to significantly expand its recycled water production in the coming years. The longterm goal is to serve more than 10,000 acre-feet of recycled water – roughly 45 times what is served today.

WATER BANKING

SCV Water stores (“banks”) about 141,000 acre-feet of water in Kern County. We can call for this water in times of need.
