Subject: EPA PFAS listing and agenda item request

Hi Matt and Steve:

I'm sure you are getting all the information on this, but this has some good secondary links in it as well.

<https://www.epa.gov/newsreleases/epa-proposes-designating-certain-pfas-chemicals-hazardous-substances-under-superfund>

It will be important to speak for water utilities so that they are not penalized for this from a liability standpoint. At some point when we have a light agenda it would be nice to hear how this will affect the water utilities and what they have concerns about. Concerns will be raised during rulemaking, no doubt.

Thanks
