**SCV Water is Seeking Vendors to Participate in Open House Event
Save the Date for SCV Water's Annual Open House Saturday, May 12, 2018**

To Celebrate California's Water Awareness month, SCV Water will hold its annual Open House on Saturday, May 12 from 9:00 a.m. to 2:00 p.m. in Central Park and at its conservation garden and patio located above the park. This free event is for all SCV residents and provides information and tips on water-saving tools and practices.

This year, SCV Water is inviting local businesses, community groups and environmental agencies to participate in this free public outreach event. Potential vendors should provide products or services that focus on water efficiency, landscape ideas and services, and environmental sustainability.

Previous vendors include LA County Fire Urban Forestry Unit, Ranger Frank and his Wild Friends, local landscape designers and many more. Composting classes and a children's water conservation show are some of the activities that will be offered, plus free popcorn, frozen lemonade and free face painting. The event typically attracts as many as 1000 attendees.

If you are interested in becoming an Open House vendor, please email Karen Denkinger, event coordinator, at kdenkinger@scvwa.org. with information about your business/organization.

###

About SCV Water:

The Santa Clarita Valley Water Agency (SCV Water) is a full-service regional water agency located in the Santa Clarita Valley. SCV Water provides water service to business and residential customers – half are local groundwater supplies and the other half is imported from the State Water Project and other sources.

SCV Water was formed on January 1, 2018 and combines the former service areas of Castaic Lake Water Agency, Newhall County Water District, Santa Clarita Water Division and Valencia Water Company. Following a multi-year public engagement process, the agency was formed through Senate Bill 634 authored by Senator Scott Wilk and signed by Governor Jerry Brown on October 15, 2017. SCV Water was formed to improve regional water management, enhance water governance and reduce costs for local ratepayers.
