SCV Water Releases 2026 Annual Consumer Confidence Report

Water supplied to customers continues to meet or surpass State and Federal quality standards

SCV Water's is proud to announce its 2026 Annual Consumer Confidence Report is now available for customers to review. This year's report, compiled in partnership with Los Angeles County Waterworks District #36, shows that water provided by the Agency to customers continued to meet or surpass rigorous State and Federal drinking water compliance standards in 2025.

"Over the past year, SCV Water has continued its mission to restore local water quality and groundwater supplies, while also preparing for the future water needs of Santa Clarita as our community grows," said SCV Water General Manager Matt Stone. "We are proud to provide our customers with safe, reliable, drinking water. I encourage our customers to read our report to learn more about the quality of your water, our commitment to sustainability, and the work we do protect our local resources."

The report, also referred to as a Water Quality Report, is an annual requirement from the State Water Resources Control Board's Division of Drinking Water (DDW). It provides a snapshot of local water quality supplies in the Santa Clarita Valley and details where the Agency's water comes from, what it contains, and how it compares to strict water quality standards.

Before reaching a customer's tap, the Agency's water supply must withstand rigorous rounds of treatment and monitoring. More than 20,000 tests per year are performed to ensure a safe water supply is delivered to customers.

The full report is available online in both English and Spanish:

- English: yourscvwater.com/CCR2026
- Spanish: yourscvwater.com/CCR2026espanol

All SCV Water customers will receive a bill insert no later than June 30, 2026, notifying them that the report is available. Customers can also obtain printed copies in both languages by calling (661) 294-0828 or emailing ccare@scvwa.org.

SCV Water is planning for the future by enhancing groundwater sustainability, expanding our recycled water systems, and managing a robust water shortage strategy. The Agency also remains dedicated to exceptional water stewardship by providing reliable quality water to customers.

###

About SCV Water:

The Santa Clarita Valley Water Agency (SCV Water) is a full-service regional water agency located in the Santa Clarita Valley. SCV Water provides water service to approximately 75,000 business and residential customers. It was formed on January 1, 2018, when local water suppliers combined into one integrated, regional water provider. More information can be found at www.yourSCVwater.com
