

SCV'S BRIDGEPORT PARK

SUSTAINABLE LANDSCAPE DEMONSTRATION GARDEN

Bridgeport Park Sustainable Landscape Demonstration Garden is a collaborative partnership between SCV Water, the City of Santa Clarita and local landscape designers. This demonstration garden provides the SCV community and landscape professionals with accessible, interactive sustainable landscape concepts, inspiration and supplemental educational opportunities.

BRIDGEPORT PARK SUSTAINABLE LANDSCAPE GARDEN FEATURES AND COMMUNITY BENEFITS

- Located at the City of Santa Clarita's Bridgeport Park
- 14,800-square-foot demonstration garden
- Facility includes sustainable landscape designs, native plants, low-water using plants, high-efficiency irrigation, water conservation education and a permeable concrete pad
- Benches for visitors to rest
- Signage to support visitor learning and engagement

BENEFITS OF SUSTAINABLE LANDSCAPES

- Lower water bills as drought-tolerant or native
- Landscapes require 40-60% less water than turf grass
- Less water waste through runoff and over irrigation
- More resilient to drought and climate change
- Lower maintenance once established
- Native plant species create habitats for native birds, bees, butterflies, and other beneficial insects and pollinators
